

HEROES WEAR HAIX®

Flame-retardant fabric

Two-zone lacing through clamp ring

Flame-retardant fabric

The inside of the shoes is made from very abrasion-resistant leather – no seams in the lacing area; ideally suited for “fast roping”

Impenetrable sole - protection from nails, etc.

Inlay with excellent shock absorption and moisture transportation properties

- Very lightweight, durable work boot that fits superbly and is extremely comfortable – tested and developed in collaboration with special forces.
- “Slim” looking on the foot
- GORE® CROSSTECH® Membrane – Waterproof/breathable barrier preventing the penetration of “body fluids”, resistant to bacteria, increased protection against chemicals, flameproof
- Padded ankle section, good ankle protection
- Highly flexible, good protective function
 - Upper – full grain hydrophobic cowhide
 - Flame-retardant fabric in the areas of the tongue and upper edges.
 - Impenetrable KEVLAR® sole inlay – protection from nails
- Lacing
 - Closed lacing system – no risk of catching, no trouser leg abrasion.
 - Two-zone lacing – the instep and shaft lacing can be separately and permanently fixed at different levels of tightness.
 - Nickel-free lacing system, rust-free, no stud fastened through the lining.
- Ideally suited for “fast roping” – no seams in the lacing area on the inside of the shoe and only very abrasion-proof materials; pronounced rubber sole edge with good “braking” properties.
- The sole has proven its worth in police operations:
 - Excellent non-slip properties (even at cold temperatures and on smooth surfaces)
 - Self-cleaning
 - Allows you to walk quietly
 - Impact absorption over the entire surface of the sole
 - Non-marking
 - Oil and fuel resistant
 - PU impact absorption wedge for good insulation against the cold (approx. 70 % of foot coldness comes through the footbed and sole)
- Anatomically shaped, removable insole with moisture transportation and good shock absorption
- antistatic
- **Sun Reflect:** Reduces the heating effect of the upper leather by direct sunlight. Sunlight is reflected by the leather, keeping the leather and the feet cooler.

HAIX® GSG9-S

Art.-No. 203102

Leather thickness 1.8 – 2.0 mm, waterproof, breathable, bacteria and chemical resistant with CROSSTECH® Laminate Technology, HAIX® Climate System, HAIX® MSL System, leg height 8 inches, antistatic

Available sizes: 4 ½ – 16 & half sizes

Widths: Medium, Wide
